Comodo Extended Validation Multi-Domain Certificates

The cost effective EV solution for merchants of all sizes

Extended Validation Multi-Domain SSL certificates (EV MDC's) allow you to secure up to 100 different domains or sub-domains with a single SSL certificate.

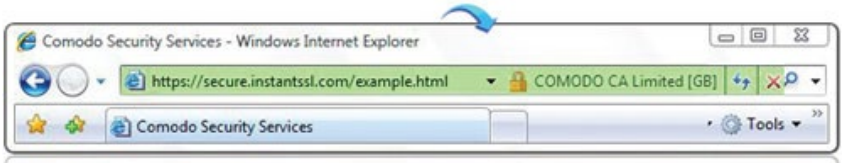
EV technology adds an additional layer of trust to your online business by turning the browser address bar green every time one of your customers enters the secure area of your website.

With EV MDC's, Comodo has made it financially viable for online merchants to deploy EV technology on all websites that they operate.

What is an Extended Validation Certificate?

EV SSL certificates provide the highest levels of encryption, security and trust and immediately reassure web site visitors that it is safe to conduct online transactions by turning the address bar green on next generation browsers such as Internet Explorer 7 +, FireFox 3 + and Opera 9.5 +

The green bar instantly indicates to customers that an independent third party has thoroughly validated the legitimacy of the business behind the website to the highest possible levels – immediately earning their trust and help you to improve conversion.



Get the green bar on all your websites and make huge cost savings

EV MDC AT-A-GLANCE

- Save hundreds or thousands of dollars per year over the cost of individual EV SSL certificates
- Each of your sites will display the trust building green address bar to your website visitors – instantly boosting your customer conversion rates
- Secure up to 100 Fully Qualified Domain Names on a single certificate
- Base EV certificate covers 3 domains
- Additional domains cost just $99 per year and can be added at any time during the certificate life cycle
- Easy to deploy by using our patent-pending EV Enhancer technology
- Simple and convenient - only one certificate to manage for all your domains

Who needs an EV Multi-Domain Certificate?

EV Multi-Domain Certificates are the perfect solution for small to medium sized businesses looking to get the green address bar on all their websites using a single certificate.

Through a single certificate you can secure up to 100 fully qualified domains or websites on a single IP address. For example, one Multi-Domain Certificate for a single IP address can be used to secure:

- https://secure.website1.com
- https://secure.website1.co.uk
- https://www.website.com
- https://secure.website2.com
- https://login.web2.com
- https://any-domain.any-tld

EV MDC SSL - 1 Year $498

- Secure 3 domains with one certificate
- Additional domains cost just $99/yr
- 30-day money back guarantee
- Free dynamic site seal
- Huge savings over separate purchases

EV MDC SSL - 2 Years $798 (save 10%)

How much will you save?

EV MDC's allow you to simplify SSL management processes and save you money versus individual EV certificate purchases

Number of domains	Comodo EV MDC 1 yr	Individual 1 yr EV certificates	You save
3	$498.00	$747.00	$249.00
4	$597.00	$996.00	$399.00
5	$696.00	$1245.00	$549.00
10	$795.00	$2490.00	$1695.00

For example, a 1 year base certificate includes 3 domains for $498 /year. After these first 3, up to 97 additional domains can be added at just $99 yr each. A business with 3 domains will save $249 buying an MDC over individual EV certs. If you have 5 domains, you'll save $549. If you purchase a 2 year EV you'll save even more!
