Comodo Multi-Domain Certificates

The cost effective SSL solution for merchants of all sizes

Multi-Domain SSL certificates (MDCs) allow you to secure up to 100 different domains or sub-domains with a single SSL certificate.

Simplify SSL Management

Deployment and management of multiple SSL certificates in a business can be a cumbersome, time consuming exercise. A dedicated administrator will need to purchase and deploy certificates seperately then keep track of the term and expiry date of each. Allowing the certificate to lapse on just of your sites could have damaging consequences. You may lose the ability to take payments online and the error messages your customers see could damage your reputation.

You can consolidate as many as 100 domains on a single, easily managed, Comodo MDC. This mitigates the certificate life-cycle burden and improves the overall efficiency of your website security operations. By simply adding domain names to the subject alternative name (SAN) field, you can expand the coverage of your certificate at anytime. You can even add wildcard domains to an MDC. On top of this, a Comodo MDC can potentially save you thousands vs the cost of individual certificates.

Featuring fast online issuance,the strongest possible levels of encryption and dedicated customer support, Comodo MDC certificates let you create a highly secure e-business environment within minutes.

Highest Encryption Strength

2048 bit signatures and up to 256 bit encryption means Comodo MDC SSL certificates offer the highest possible levels of security for your customers. The key length satisfies the National Institute of Standards and Technology (NIST) recommendations.

MDC AT-A-GLANCE

- Simplify SSL management by using one certificate to secure all your domains
- Secure up to 100 domains or wildcard domains on a single certificate
- Save money over the cost of individual SSL certificates or wildcards
- Base certificate costs $330 for three domains
- Additional domains cost just $95 and can be added at any time during the certificate life cycle
- Wildcard domains can be added to the MDC for just $399 each per year

Unlimited Server Licenses

Unlike other certificate authorities, we do not double, triple, or spike the price of your certificate if you wish to use it on different servers. Each MDC comes with unlimited server licensing included in the price - meaning you are free to install it on as many physical servers as you wish.

99.9% Browser Coverage

Comodo root certificates are embedded in all major browsers and devices and are trusted by 99.9% of the worldwide Internet population. This helps to maximize the size of the audience that your business can offer secure services and take payments.

Comprehensive Support Plans

Comodo has a well earned reputation for industry leading customer care and technical support. As a valued customer, you can expect prompt telephone, mail and web-based support for any questions you may have during the application, installation and lifetime of the certificate.

Who needs a Multi-Domain Certificate?

Multi-Domain Certificates are the perfect solution for small to medium sized businesses looking to secure all their websites using a single certificate.

Through a single certificate you can secure up to 100 fully qualified domains or websites on a single IP address. For example, one Multi-Domain Certificate for a single IP address can be used to secure:

https://secure.website1.com
https://secure.website1.co.uk
https://www.website.com
https://secure.website2.com
https://login.web2.com
https://any-domain.any-tld
