

Comodo HackerGuardian™

Painless PCI™ Compliance

COMODO
Creating Trust Online®

Comodo HackerGuardian

Comodo HackerGuardian allows merchants and enterprises of all sizes to quickly and pragmatically steer their organization towards PCI compliance.

PCI Scan Compliance and Validation

Comodo HackerGuardian is a fully featured and highly configurable vulnerability scanning solution that helps enterprises, payment gateways, and e-commerce merchants quickly achieve **PCI scan compliance**.

Through a centralized portal, designated compliance managers can easily group entire networks into a single device before running PCI mandated quarterly vulnerability scans. After every PCI scan you'll receive detailed executive and technical audit reports summarizing security holes that were found on the target network. These areas of non-compliance are accompanied by expert, cross referenced, remediation advice that help resolve the specific issue in the most effective manner possible. After a successful PCI scan (no vulnerabilities with a CVSS base score greater than 3.0), compliance managers are provided with an official PCI Scan Compliant report that can be submitted to acquiring institutions to meet ongoing compliance requirements.

Comodo HackerGuardian vulnerability scans can be run on externally facing IP ranges and hosts and on internal networks protected by a firewall or other network security devices. The service is highly configurable and features a free Payment Credential CVC site-seal - helping to reassure web-site visitors that you are authorized to take card payments online.

KEY FEATURES AND BENEFITS:

- › Remotely scan networks and devices with the full battery of vulnerability tests in the PCI specifications
- › Generates official 'PCI Scan Compliant' reports from a PCI Approved Scan Vendor needed to validate ongoing compliance
- › Schedule scans according to organizational preference via the intuitive dashboard interface
- › Executive and technical audit reports contain clear advice on how to fix most vulnerabilities **security**
- › Capable of scanning for vulnerabilities on internal networks as well as externally facing hosts
- › Includes a complimentary Payment Credential website logo to build trust with visitors during checkout **website**
- › No additional hardware or software purchases necessary
- › Cost effective and flexible package offerings tailored to suit businesses of all sizes with **sizes with** room for future growth

Comodo does not foist an inflated 'one-size fits all' package on your business - which means you don't end up paying for scanning capacity that you will never use. Comodo HackerGuardian's low cost and flexible purchasing options allow you to construct a package that dovetails with your precise PCI requirements. Businesses that are unable to find what they need on the website are encouraged to contact us directly to discuss a plan more suited to your needs.

WHAT IS PCI?

The Payment Card Industry Data Security Standards (PCI DSS) are a set of 12 requirements developed jointly by Visa, MasterCard, JCB International, Discover and American Express to prevent consumer data theft and reduce online fraud.

The PCI DSS represents a multifaceted standard that includes requirements for security management, policies, procedures, network architecture, software design and other critical protective measures.

Compliance and validation of compliance with some or all of the 12 requirements is mandatory for any organization that stores, transmits or processes credit card transactions.

Comodo CA Limited is a PCI Approved Scanning Vendor (ASV). The Comodo HackerGuardian interface helps organizations achieve specific compliance with section 11.2 of the guidelines while the intuitive PCI wizard provides unparalleled guidance and assistance towards compliance with all 12 requirements.

COMODO HACKERGUARDIAN - FEATURES AND BENEFITS

Simple to implement and scalable to your needs - merchants, payment gateways and enterprises and of all sizes can quickly configure and run PCI scans with minimal configuration and effort.

Fits your budget - intuitive web based interface eliminates the expense of hardware or software licenses, attendant installation, and maintenance costs.

Flexible package and purchasing options mean businesses buy the service they need instead of paying for a vendor preset with scan capacity they may never use.

Centralized portal allows administrators to group entire networks of IP addresses and domains name into a single device for repeat, single click scans.

Comprehensive post scan reporting includes trend analysis and executive summaries alongside actionable threat mitigation advice.

Automatically generates 'ready-to-go' PCI Scan compliance reports that can be immediately submitted to your acquiring bank as proof of compliance.

Service includes a payment credential website logo to conclusively reassure website visitors that you are authorized to accept credit cards.

Freedom to go beyond PCI. The Comodo HackerGuardian interface allows administrators to create and run on-demand scans to test network infrastructures according to specific threat profiles.

Additional PCI Products and Services

Comodo Group Incorporated resells products and services that help satisfy many of the PCI DSS requirements – including the Comodo HackerGuardian vulnerability scans that deliver compliance with section 11.2 of the PCI guidelines; **SSL Certificates** for securing online transactions; two-factor authentication for access control to enterprise portals; and email encryption.

Comodo understands the unique challenges of managing compliance and delivers a PCI solution that can only be achieved by true understanding of the compliance process. Deploying Comodo solutions means embarking on a relationship with a security partner that has the deepest expertise, experience and understanding about how to help businesses achieve their security, compliance and productivity goals.
